LinkedIn | LeetCode | GitHub | CodeChef

Education

Thapar Institute of Engineering and Technology, B.E. in Electrical and Computer Engineering

CGPA: 8.4 (Till Semester 6)

Aug 2023 – Present

Coursework: Deep learning, Machine Learning, Design and Analysis of Algorithms, Operating Systems, Object Oriented Programming, Data Structures, Database Management Systems, Cyber Security, Computer Networks, Programming for Problem Solving, Mathematics for Data Science

Experience

Rezo.ai, Data Science Intern

Jun 2026 – Present

Evaluated and benchmarked open-source models on voice through comparative analysis, stress testing, and load testing to assess performance, latency, and scalability. Working on an internal AI-powered code sanity tool to automate code quality checks and validation.

Ernst & Young (EY), Consulting Intern – Telecommunications Sector

Jun 2025 – Jul 2025

Conducted market research and data analysis for telecommunications clients

C3iHub, IIT Kanpur, ML Research Intern

Apr 2025 – Jul 2025

Developed AI-powered anomaly detection systems to enhance cybersecurity in Electric Vehicles.

Team Fateh – Formula Student, Thapar Institute of Engineering and Technology

Nov 2023 – Nov 2024

High Voltage & Management Department

- Prepared Cost Bill of Materials (CBOM) and Cost Explanatory (CEXP) documentation.
- Contributed to business planning, including sales projections, balance sheets, and P&L statements.
- Represented India at Formula Student Italy 2024, securing 5th Overall, 6th in Design, and 6th in Cost.
- Won 1st place nationally in Procurement at Pi-EV by Formula Bharat.

Association for Computing Machinery (ACM), Thapar Institute

Sept 2023 – Sept 2024

Active Member – Secured 3rd position in Inter-Society "Code Sprint" competition

Projects

NoteAI – AI Study Assistant

GitHub

- Built RAG-based system for semantic search and contextual Q&A over notes
- Developed chatbot, concept graph, flashcard and quiz generation
- **Tech:** Python, FastAPI, FAISS, Sentence Transformers, LLM APIs, ReactJS

Kortex – AI Personal Memory System

Live | Bot

- Built Telegram-based system for storing and querying thoughts using embeddings
- Added reminders with Google Calendar integration
- **Tech:** Node.js, Telegram API, LLM APIs, Vector Search

Thapar Lab Inventory Management System

Live

- Built full-stack system for lab inventory tracking and management

– Selected for pilot deployment in college labs

– **Tech:** ReactJS, Node.js, Express, MongoDB

Smart Energy Meter – ESP32-based real-time power monitoring system

Smart Stick for Visually Impaired – Ultrasonic obstacle detection; state-level recognition

Certifications Achievements

- Selected among the Top 50 finalists nationwide in Atom HackQuest 2026
- Tableau 2024 A–Z: Hands-On Tableau Training for Data Science – Udemy
- Supervised Machine Learning: Regression and Classification – DeepLearning.AI
- Advanced Learning Algorithms – DeepLearning.AI
- Completed the SQL 50 curated problem set on LeetCode

Technical Skills

Languages: Python, C++, C, JavaScript, SQL, HTML, CSS

Frameworks Libraries: ReactJS, Node.js, Express.js, FastAPI, Sentence Transformers

Databases Vector Stores: MongoDB, FAISS

AI/ML: Machine Learning, Deep Learning, RAG, LLM APIs, Vector Search

Tools Platforms: Git, Arduino, ESP32, Tableau
